

Fatima de la Iglesia

Junior Web Development

S U M M A R Y

I am a Junior Web Developer with a strong passion for creating engaging, user-friendly, and functional digital experiences. Through my training and personal projects, I have developed skills in HTML, CSS, JavaScript, and modern technologies such as React, Node.js, and databases. I enjoy solving problems through code and enhancing user experiences by focusing on performance, usability, and accessibility.

My goal is to continue learning and growing within a dynamic team where I can apply my knowledge and contribute to innovative projects. While I am particularly interested in front-end development, I am also eager to expand my expertise in back-end and full-stack development.
